

## Goals

Have a minimum functioning version of the application. These features include creation and management of user and management accounts, and tours. Additionally, these features should work with Google Maps API and a server for the backend.

## Sprint Backlog

|                           |
|---------------------------|
| Create Manger Account     |
| Create User Account       |
| Login/out Manager Account |
| Login/out User Account    |
| Google Maps Integration   |
| Firebase Integration      |
